EDUCATION

Stevens Institute of Technology

Bachelor of Science in Computer Science

Hoboken, NJ

Expected Dec 2026

- **GPA:** 3.7
- **Coursework:** Web Programming, Machine Learning, Computer Vision, Data Structures, Algorithms

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern

Jun 2026 – Aug 2026

KIOXIA

San Jose, CA

- Modernized a legacy Excel/VBA Opportunity-to-Revenue system into a secure enterprise web application using React, Flask, and SQL Server
- Developed authenticated REST APIs and database workflows with SQLAlchemy, implementing transactional versioning, concurrency safeguards, and role-based auth.
- Engineered a responsive frontend architecture with React and Material UI, replacing manual spreadsheet navigation with dynamic data grids, cascading forms, and streamlined lifecycle management workflows.

Software Engineer Intern

Jan 2026 – May 2026

FiPet

Remote

- Engineered cross-platform mobile features using React Native and Expo Router for a financial education app, focusing on UI/UX enhancements and real-time state management.
- Optimized frontend logic using React Context and custom hooks to interface with Firestore listeners, ensuring seamless data synchronization for user progress and gamification stats.
- Collaborated on a scalable backend architecture with Firebase Cloud Functions and Auth, supporting secure server-side validation for reward distribution and automated streak tracking.

Web Application Intern

May 2025 – Sep 2025

New Jersey Resources

Wall, NJ

- Built a full-stack application to manage overtime and callout data for **100+** Dispatch and Home Services employees, modernizing a legacy system.
- Developed with ASP.NET Blazor Server, SQL Server, and Azure DevOps, implementing authentication, authorization, RESTful APIs, and worker services to manage **500+** overtime/callout entries bi-weekly.
- Improved UI/UX with mockups, proof-of-concepts, and stakeholder feedback; presented progress in meetings with managers and department heads.

ChatGPT Lab Collaborator

Mar 2025 – Jun 2025

OpenAI - <https://edunewsletter.openai.com/p/100-ways-college-students-are-using>

Remote

- Selected in small group of students nationwide to improve student engagement with ChatGPT.
- Co-authored **3** reports on AI-driven learning practices, shaping OpenAI's research for AI in Education.

PROJECTS

WaveWatch | Next.js, Tailwind, Supabase, YOLOv8, FastAPI

Feb 2024 – Present

- Built a surf forecasting web app that visualizes swell, tide and weather data to help surfers evaluate conditions
- Fine-tuned a YOLOv8 model on **4k+** surf images to detect wave regions (pockets, barrels) with a FastAPI backend.
- Integrated forecast and environmental APIs, delivering accurate, real-time surf analytics

Spartan Games | Next.js 14, TypeScript, Supabase, PostgreSQL

Jan 2026 – Present

- Deployed a full-stack gamified fitness app for **100+** members, processing **600+** weekly submissions.
- Engineered a real-time leaderboard using Supabase Realtime and Row Level Security (RLS) for secure data access.
- Automated administrative overhead by **5+** hours/week through an admin dashboard with Nodemailer and Cron jobs.

Flare (Hackathon) | React, TypeScript, DistilBERT, FastAPI

Feb 2026

- Chrome extension for detecting AI-generated text/images
- Fine-tuned a **67-million parameter** DistilBERT model on a **48k+** sample dataset (HC3), deploying a FastAPI service capable of scoring text blocks (60+ words) and compressing images (512px) in real-time.

TECHNICAL SKILLS

Languages/Frameworks: React/React Native, Next.js, Node.js, TypeScript, Python, ASP.NET, C#, SQL

Tools/Backend: Supabase, Firebase, MongoDB, PostgreSQL, Azure DevOps, Git, Docker, FastAPI
